

iGrafx® ENTERPRISE CENTRAL™

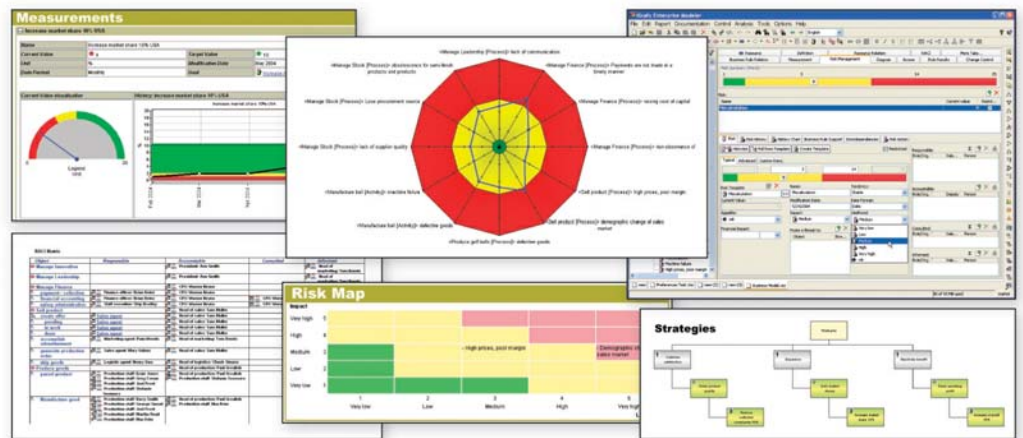

iGrafx® ENTERPRISE MODELER™

iGrafx Enterprise Central is ideal for organizations engaged in:

- Enterprise Modeling
- Enterprise Architecture
- SOX Compliance
- IT Governance
- Risk Management
- Business Continuity
- Quality Management
- Six Sigma
- Lean Manufacturing
- ISO Certification
- Business Process Management

Enterprise Strategy, Alignment and Control

iGrafx® Enterprise Central™ is an enterprise modeling solution that aligns company processes, resources, and systems with corporate goals and strategies. iGrafx Enterprise Central includes iGrafx Process Central and enables compliance management, risk management, enterprise architecture and quality improvement initiatives. Through data integration and visual workflows, organizations develop comprehensive organizational models with multidimensional views of business processes, supporting systems, technology components and resources.

Key Applications	Benefit
Enterprise Business Architecture	Enables better understanding of complex, multidimensional concepts and improves ability to plan business and technology investments.
NEU Enterprise Process Architecture	Outside of Enterprise Modeler, the process architecture can now be viewed and navigated by users of Process Central and Web Central.
Compliance	Enables complete documentation and ongoing compliance with initiatives such as Sarbanes-Oxley.
Risk Management	Structured, inter-related models that enable risk identification and analysis for effective management and risk mitigation.
IT-Governance	IT service management that enables the control, consistency and management of IT projects.
Business Continuity	Performs impact analysis and identifies system and process interdependencies for scenario planning.
Quality Management	Measure and ensure that all processes necessary to produce products and services are effective and efficient.
Business Process Management	Centrally manages, stores, archives and controls all process documentation.
NEU Accelerators	Accelerators enable end users to define a comprehensive enterprise business architecture more quickly and ensure it's aligned with appropriate industry standards or published enterprise frameworks.

Achieve Enterprise Wide Business Cohesion

Optimizing processes and ensuring alignment with IT initiatives and enterprise strategy is key to the success and survival of all organizations. Companies must take a comprehensive approach to process-oriented initiatives such as IT Service Management, Enterprise Architecture, Sarbanes-Oxley, Risk Management and Six Sigma. Enterprise modeling tools enable the completion of these initiatives in a controlled, collaborative manner.

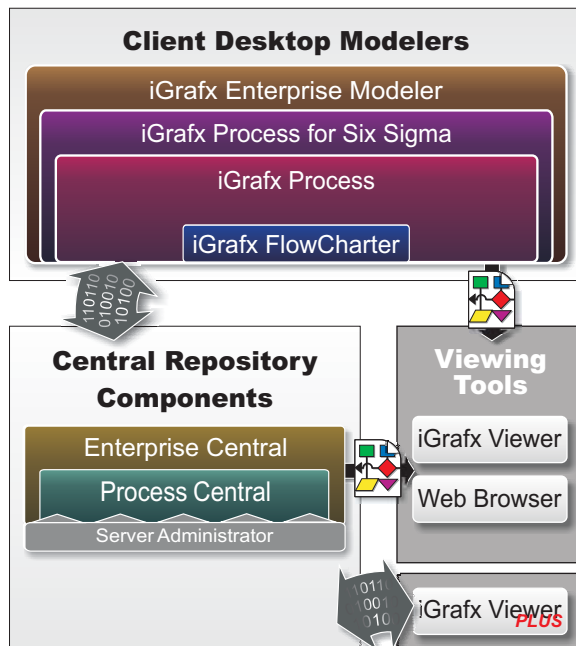

iGrafx Enterprise Central creates multi-dimensional views of an organization by capturing dependencies between processes, resources and systems, thus allowing the organization to measure and evaluate quality, costs and risks, monitor and control organizational performance and conduct impact analysis. With a central database of enterprise knowledge, iGrafx Enterprise Central models business process components and allows organizations to predict impacts and plan for efficient process and system changes.

iGrafx® Enterprise Modeler™ is the companion client to iGrafx Enterprise Central and provides full support for the RACI matrix (Responsible, Accountable, Consulted, Informed) to assign cross-functional responsibilities. Through its link to the Enterprise Central repository, iGrafx Enterprise Modeler ensures model consistency and completeness. With iGrafx Enterprise Modeler, users can generate actionable tables, matrices and graphics in an easy to use, visual environment to help ensure compliance, control and informed decision-making.

A Foundation for Enterprise Excellence

iGrafx Enterprise Central extends the capabilities of iGrafx® Process Central® (Process Central is included with Enterprise Central) and works with the family of iGrafx process analysis tools for a unified approach to strategic modeling and process excellence. iGrafx will help you bridge the gap between the major organization constituencies – IT, process initiatives and business analysts – to ensure a level of process consistency, management, history and control across the enterprise.

iGrafx is an integrated suite of software and services for process excellence.
